The Territory Boundless Possible

The NT Resources Week 2019 Exhibition will provide you with an exceptional opportunity to showcase your products, innovations and services to Northern Australia’s resources industry markets across two massive days in our exhibition hall.

Northern Australia’s leading Mining Industry Conference – A unique top-end experience. Join us for a comprehensive programme covering every step from exploration and development to operation and logistics. Hear from some of the industry’s leading operators Glencore, South32 GEMCO, and Newmont Goldcorp alongside a catalogue of key near-term and prospective projects from Core Lithium, Tellus Holdings, Kirkland Lake Gold, Vista Gold and more. Featuring commentary from government officials and sector stalwarts, Mining the Territory is the major gathering in Northern Australia’s Mining Calendar and an event not to be missed.

Northern Australia’s largest and longest established petroleum conference returns for its 25th year. This marquee conference features presentations from all of the region’s major players including INPEX, ConocoPhillips, Santos, Origin Energy, Shell and many more. A key focus will be on the next wave of offshore projects which are being brought forward for development, and what this will mean for investment in Australia’s north. The enormous potential for an onshore gas industry in the NT will also be covered in detail and the new opportunities discussed. This simply is the must attend gathering for everyone associated with the petroleum and gas industries in Northern Australia.

New to 2019, Environmental Management & Logistics Forum will explore new opportunities to service the mining and onshore gas sectors in the Territory, better manage their environmental impact, and analyse new business development and economic growth potential while also supporting stakeholder engagement and regional development. The forum will cover key topics such as government approvals, environmental management of mining and onshore sites, mine site rehabilitation, groundwater and waste site management, local content and social responsibility. Bringing together environmental practitioners, government representatives and leading members of the resources industry, this detail-oriented program is a must attend event for the sector and its stakeholders.
